

The screenshot shows a Java Swing window titled "Jared Kitchen" with standard window controls (minimize, maximize, close). The window's content area has a light gray background and is titled "ComboBox Baseline".

Inside the window, there are three labels and three input fields:

- A label "Select a country:" is positioned above a dropdown menu. The dropdown menu currently displays "United States" and has a small downward arrow on its right side.
- A label "Selected country:" is positioned above a text input field. The text field contains the text "United States".
- A label "Selected country list index:" is positioned above another text input field. This field contains the number "198".

In the bottom right corner of the window, there is a button labeled "Quit".

At the very bottom of the image, below the window frame, there is a line of text: "e user to select input fields and enter values into them, click on buttons, and".
